“JFC supply customised tanks for use by local authorities and national water companies”

AQUACUBES

**EMERGENCY
WATER TANKS**

JFC **Aquacubes** are widely used in emergency situations to provide water to the public when adverse weather conditions including flooding, severe freezing, drought or general maintenance and repair impacts on mains and water supply.

In such situations these tanks are typically placed in a convenient location to supply emergency water to domestic residences in the event of mains water supply failure. JFC supply customised tanks for use by local authorities and national water companies with standard models available in 1100 and 1800 litre capacities.

Available in **1100L & 1800L**

Suitable for **Potable** water use

Lockable external lid

Integrated forklift guides for ease of manoeuvrability

Optional **2.5 inch fitting** for **fast filling** via a water hydrant

Tailor made to **customer specific requirements**

Moulded in Details

Approved under Regulation 31 of the Water Supply Regulations 2000 which implements Article 10 of the council of European Union Drinking Water (DWD) for use in public water supplies.

CODE:	CAPACITY:	DIMENSIONS:
ULCG350	1100 Litres	1000mm (W) x 1200mm (L) x 1740mm (H)
ULCG450	1800 Litres	1420mm (W) x 2292mm (L) x 1105mm (H)

| Lockable manway cover

| Instantaneous filling port
