JFC Electricity Cables Marker Posts

JFC Electricity Cables Marker Posts are a strong and durable piece of safety equipment. They are used to identify the location of buried utility services and serve as a warning signal to personnel working or excavating in close proximity to pipe or live cables.

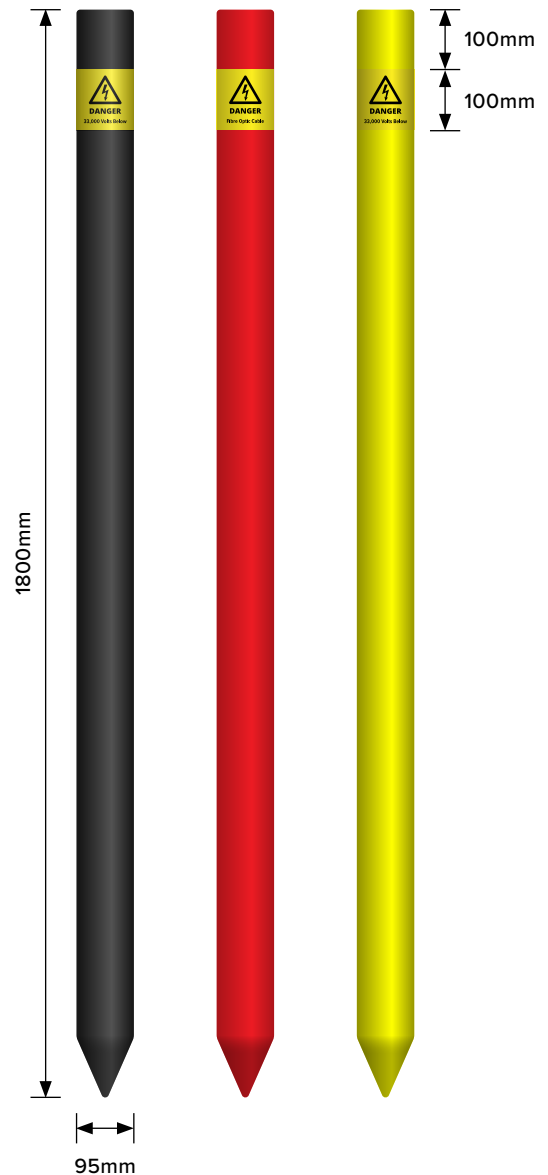

They also assist in preventing accidental damage to underground utility services and help to avoid/reduce expensive search costs.

Reflective area on the posts is 100mm high.

JFC Marker posts are extremely robust and durable with a life expectancy in excess of 30 years. They are pointed at the tip for ground penetration and have a flat cap suitable for manual or mechanical installation.
