Flow Control Chamber

JFC design a bespoke range of prefabricated catchpit chambers which incorporate either a JFC Hydro-Valve or JFC Hydro-Plate.

These units are individually fabricated to suit specific site information, such as levels, inlet / outlet pipe diameters and orientations, design flow and design head, etc.

Features & Benefits:

- Fast Installation.
- Lightweight (compared to conventional construction manholes).
- Designed to fit JFC CorriPipe™.
- Prefabricated.
- No requirement for confined space entry (during installation).
- Bespoke as per customer specifications.

JFC CorriFlow Chambers are available in four diameters:

Ø1050mm	Ø1200mm	Ø1350mm
Ø1500mm.		

Sized to suit JFC Hydro-Valve or Hydro-Plate design

Inlets and outlet and manufactured from JFC CorriPipe™ in the following diameters:

Ø110mm	Ø150mm	Ø225mm
Ø300mm	Ø375mm	Ø450mm
Ø600mm	Ø750mm	Ø900mm
Ø1050mm.		

The JFC CorriFlow Chambers come complete with either a JFC Hydro-Valve or JFC Hydro-Plate which is sized to suit the design flow and design head required.

Ladders are also included in 1200mm and 1500mm chambers (if required).
